OSA-0957-67

17 APR 1967

MEMORANDUM FOR: Director of Training

SUBJECT : Training Program - [REDACTED]

25X1A9a

25X1A9a 1. It is recommended that a full time academic training program for advanced work in the field of electronics be approved under Agency auspices for [REDACTED]. The proposed training would cover the 1967-68 academic year at the University of Virginia beginning with the fall semester in September 1967.

25X1A9a 2. [REDACTED] has been with the Agency since March 1958 and with the Office of Special Activities, DDSAT, since January 1961. A complete list of his assignments within the Agency is included in an attachment. 25X1A 25X1A He is currently serving [REDACTED]

25X1A9a Staff. In his OSA assignments [REDACTED] has distinguished himself by his technical know-how, his understanding of the engineering problems involved and his inputs to the R & D program. An important part of his current duties includes [REDACTED]

25X1A In this area, the Agency is increasingly aware of the need for officers with a high level of technical competence to give firm direction and guidance to the participating industrial representatives in all technical areas. With this in mind, the proposed training program for [REDACTED] is presented for 25X1A9a the purpose of giving him an added competence in the fields of electronic instrumentation, measurement techniques, and threat/vulnerability analysis. More specifically, the courses would provide him with a better understanding of electromagnetic wave phenomena; the associated mathematics for describing them; and the essential network theory to translate concepts into hardware for performing required tests, measurements, or analyses.
